

The *Nomade* application focuses on delivering a complete and high-quality user experience. Since performance is a key factor in user satisfaction, the project manager will take every opportunity to enhance system performance and ensure smooth operation.

In this project, **cost is fixed** and will not be compromised, while **time will be optimized during development** to achieve the best possible results within the schedule.

Therefore, **performance and quality** will be the main acceptance criteria and the top priority of the project.
